## RELEVANT COURSEWORK

- Web Development
- Machine Learning
- FrontEnd Development
- Data Science
- Embedded

## PROJECTS

### Air Monitoring System | Arduino uno, Embedded C, Sensors

June 2022 – Dec 2022

- \* Developed the system that measure the quality of air and monitor the air
- \* By using Arduino uno micro controller we can implement our system
- \* By using sensors like MQ135 , DHT11 we can monitor air quality
- \* After collecting all the data from sensors it can display on 16 x 4 LCD display

### Automatic Weapon Recognition System | Python, YOLO V8, OpenCV

May 2023 – Dec 2024

- \* Developed automatic weapon recognition system using YOLO algorithm
- \* Compare YOLO algorithm with CNN, RCNN, SSD Algorithm
- \* Developed the front end by HTML, CSS, JavaScript .etc
- \* After detecting weapon it will give strategy to defend that weapon with proper ammo nation
- \* Implemented for surveillance cameras

### Furni shopping website | HTML, CSS, JavaScript

June 2024 – July 2024
